Task Description

Select **one existing software application**, such as a mobile application, web application, desktop application, e-learning platform, banking application, university portal, hospital management system, or any other software approved by the lecturer.

Conduct a comprehensive software testing study by completing the following tasks:

- 1) Identify **at least three (2) real software defects (bugs)** in the selected application.

For each defect, provide:

- Description of the defect
 - Steps to reproduce the defect
 - Expected result
 - Actual result
 - Severity and priority
 - Possible root cause of the defect
- 2) Recommend and justify the most appropriate testing methodologies for evaluating the selected software application.
- 3) Prepare a comprehensive **Software Test Plan** that includes:
- Project Overview
 - Test Objectives
 - Scope of Testing (In Scope and Out of Scope)
 - Test Strategy
 - Test Environment
 - Testing Schedule
 - Testing Resources
 - Entry and Exit Criteria
 - Risks and Assumptions
 - Deliverables
- 4) Develop the following test cases:
- Two (2) Functional Test Cases
 - Two (2) Security Test Cases

Test Case ID	Test Scenario	Steps to Execute	Expected Result	Actual Result	Status

- 5) Prepare a professional bug report for only one (1) of the identified defects.

The bug report should include:

- Bug ID
- Bug Title
- Module/Component
- Environment
- Steps to Reproduce
- Expected Result
- Actual Result
- Severity

- Priority
- Status
- Assigned To (Optional)
- Supporting Screenshot (if applicable)

Best of Luck
